

EU MAP WEBINAR

Mountain Value Chains: heterogeneity and innovation

16 December 2021

10:00 – 12:00 (CET), Online

The [MOVING Community of Practice \(CoP\)](#) is understood as a **European-wide Science-Society-Policy interface** engaging different stakeholders around resilience to climate change and social change of mountain value chains.

In practice, the CoP includes 23 regional Multi-Actor Platform (MAPs), established in the 23 Reference Regions, and one European-level Multi-Actor Platform (EU MAP).

The **EU MAP** offers an open space to stakeholders that are interested to exchange, learn and interact at the EU level to: (1) **contribute to key MOVING deliverables**; (2) **support peer-to-peer exchanges on additional topics** relevant for the members and for the regional MAPs; and (3) **create a long-lasting community**.

Objectives of the meeting

- Present the MOVING project and launch the EU MAP;
- Showcase specific traditional or emerging value chains working on innovation and resilience to climate change;
- Exchange, learn and interact at the EU level on heterogeneity and innovation in mountain value chains.

MOVING
MOUNTAIN VALORIZATION THROUGH
INTERCONNECTEDNESS AND GREEN GROWTH

DAY 1 | 16 December 2021
