GOVERNANCE

Uniting 3 communities of municipalities:

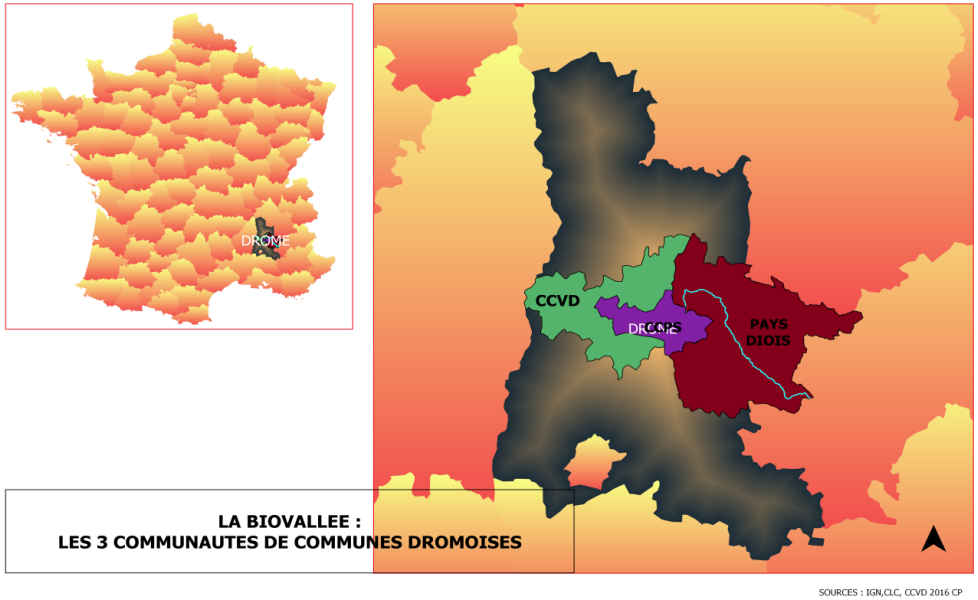
-Communauté de Communes du Val de Drôme

-Communauté de Communes du Crestois et du Pays de Saillans

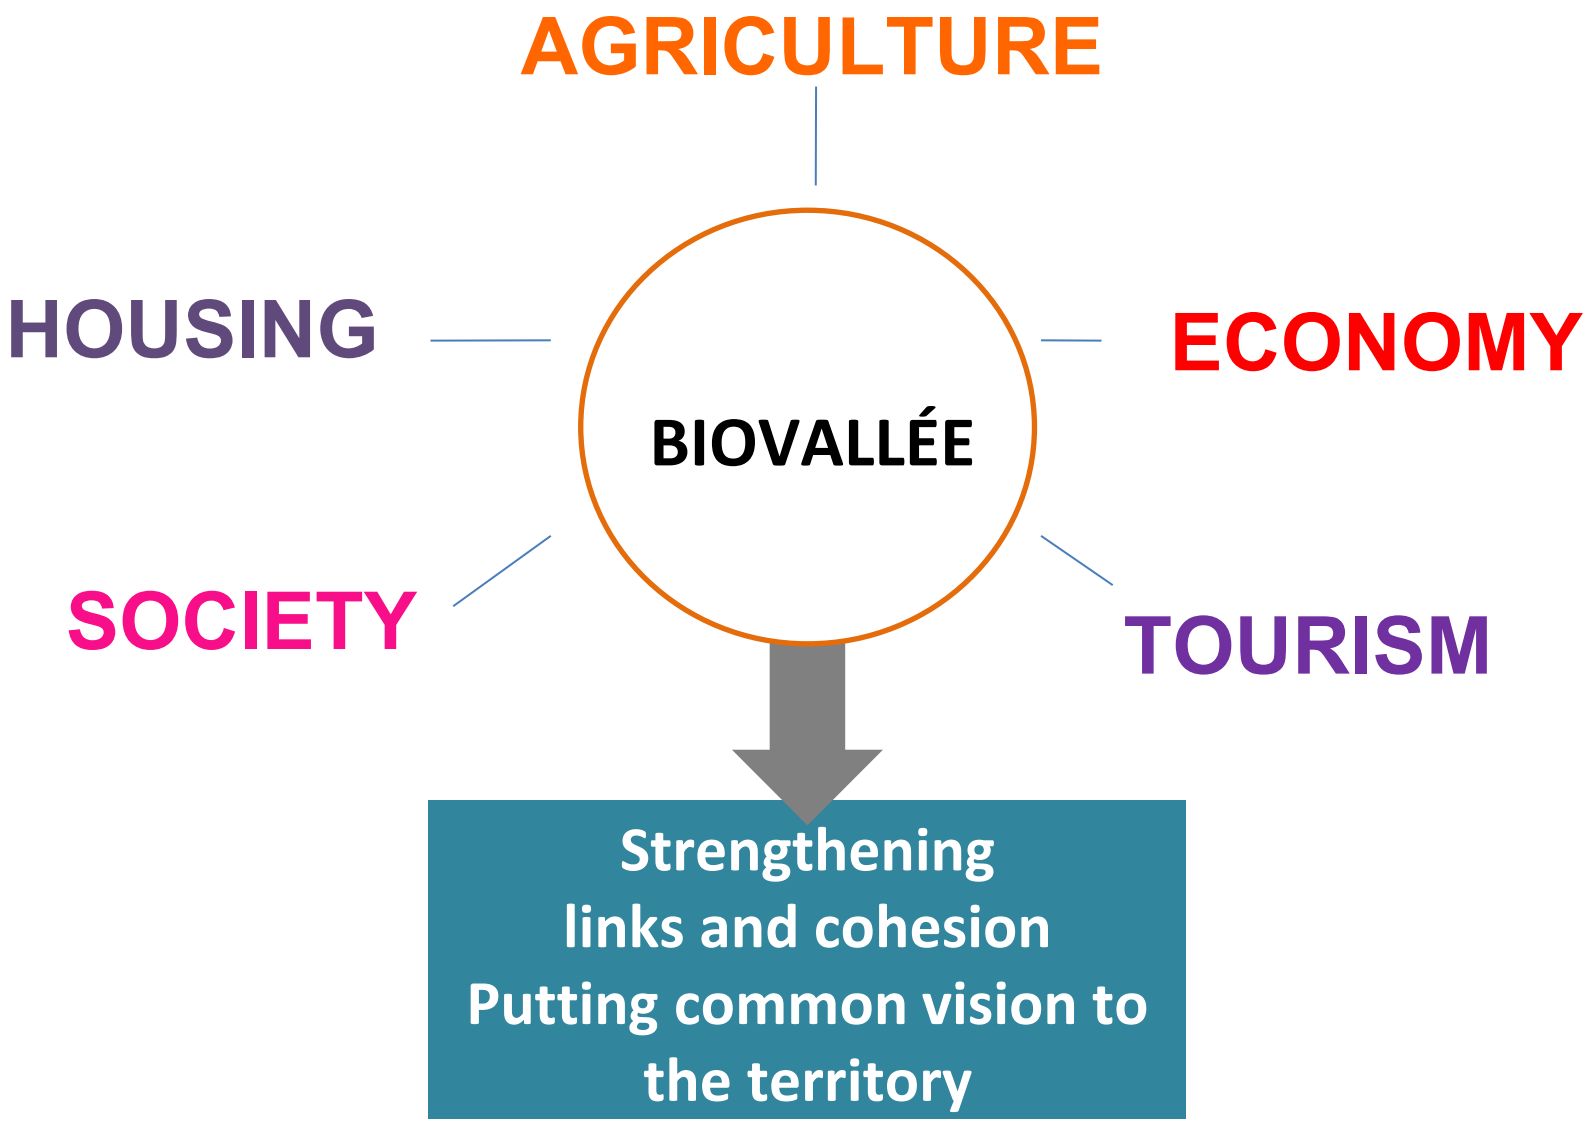
-Communauté de Communes du Diois

97 municipalities

56 000 inhabitants



INTERVENTIONS



IMPACTS

A STRONG REGIONAL DYNAMIC

In 10 years:

- 35% organic farmers
- More than 30% short circuits
- Local processing workshops
- Public awareness
- A strong start-up dynamic
- Strong collective dynamics
- Strong agricultural innovation

- Change will come from residents and local people
  - Local people can innovate, experiment and devise alternative systems
- Politicians are listening to professionals
  - Local elected representatives are the consumers' representatives and can change the situation

UP-Scaling enabling factors in BIOVALLÉE

- ✓ Strong political will
- ✓ Local stakeholders have a say
- ✓ Long term vision for the territory, making use of any kind of funding opportunities
- ✓ Support almost all innovation and experimentation
  - ✓ Embarking and supporting “alternative” projects
  - ✓ Encourage diversification, niches, local processing, keeping added value local
- ✓ Support almost all collective initiatives that are aligned with the long-term vision
  - ✓ Mobilise local funding
- ✓ Establish strong partnerships with research

UP-Scaling enabling factors in BIOVALLÉE

- Develop skills to get elected representatives involved, join forces and make ourselves heard
  - Show that it works
- Involve research and have references
  - Show that it is economically possible
- Seek funding for agriculture, but also for the environment, climate change, carbon capture, biodiversity, water reserves, experimentation, innovation, etc.
  - Agriculture is a great entry point for change, as it benefits from a lot of different funding through the CAP and Rural Policy

What is specific to MOUNTAINS

- An ecological reserve
- A biodiversity reserve
- Important carbon capture
- Reserves of essential water
- areas of innovation and experimentation

UP-Scaling enabling factors that should be fostered

- Urgency and the need for change asks to move faster at diverse policy levels, and implement relevant tools that support MOUNTAIN to tackle and address properly:
  - Environmental issues
  - Climate change, greenhouse gases
  - Energy
  - Biodiversity
  - Water management
  - Mega fire and predation management
  - Pollution
  - Health and nutrition
